

THE CLEANER FUEL, REACHING MORE HOMES

Your very own gas supply

Compact Propane Cylinders

If your property cannot accommodate a storage tank (or if you plan to use gas for cooking or gas fires only and so require less of it), neat propane cylinders provide an ideal solution.

plan or credit card. Most of all we want you to be totally satisfied with the benefits of warmth, reassurance and comfort that Flogas can bring you and your family. So we're always available on

Service with a smile

When it comes to customer service, our resources and experience put Flogas at the forefront. We've learnt not only to listen to what our customers want but to

have prepared solutions to any problems that may arise. Our prices, both for gas and gas storage rental, are very competitive and we let customers decide which way they want to pay: by cheque, direct debit, budget payment

THE CLEANER FUEL, REACHING MORE HOMES

**A Gas Supply
Beyond the Mains**

THE CLEANER FUEL, REACHING MORE HOMES

Everything you need for a cosy home

Heating System

Flogas Cosy Home Heating can be tailored to the individual requirements of your home to give you clean, efficient and controllable central heating, instant hot water, economical gas cooking, the latest range of gas fires and a gas tumble dryer.

Gas Boilers

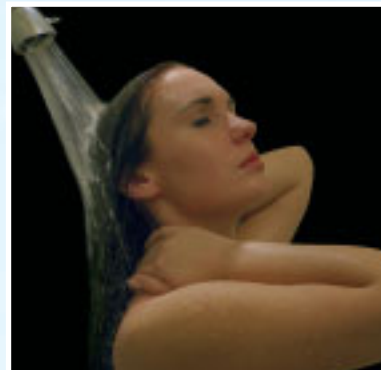

A standard Flogas Home Heating System combines the most modern home heating technology with a range of modern, compact, quiet and super-efficient gas boilers, so neat and discreet you can have one installed in your kitchen and barely notice it's there.

Efficient Condensing Gas Boilers

The option of installing a Condensing Gas Boiler should be considered. A Condensing Boiler is a high efficiency modern boiler that incorporates an extra heat exchange that extracts as much heat as possible from the combustion products (exhaust). This additional heat transfer makes Condensing Boilers far more efficient than conventional boilers and as a result they use significantly less gas to produce the same heat output.

Hot Water On tap

The heating system features an easy-to-set timer to ensure you have piping hot water whenever you need it, instantly on tap morning or evening or both, throughout the house.

What's cooking?

It's no secret professional cooks prefer gas and no wonder: it's clean, fast and controllable, helping you achieve great results every time. Gas cookers now come in all shapes and sizes so you can choose the one that best suits your needs.

Light my fire!

When the central heating's not on, or you wish to supplement it, a gas fire provides instant heat at the flick of a switch – offering you the warmth and cosiness of a real fire, flickering flames and all, without any fuel to fetch in or ashes to clear.

Drying Times

And you can now even have a gas tumble dryer - it achieves results every bit as good as any electric dryer and is far cheaper to run - installed in your kitchen, laundry or utility room.

THE CLEANER FUEL, REACHING MORE HOMES

Your very own gas supply Versatile, controllable and direct to your door... no matter where you live

LP Gas (Liquid Petroleum Gas) is already in thousands of homes throughout Ireland, efficiently providing heating, hot water, cooking and gas fires. Imagine how it could transform your home. It no longer matters whether you live close to a mains gas supply. We bring Flogas directly to you, no matter where you live.

Bulk Gas Tanks

Before you choose a tank, it's wise to consider how many different uses you might find for Flogas. More customers are now using Flogas not only for heating but for hot water, cooking, gas fires and tumble dryers too.

Your personal gas supply

LP gas is stored neatly adjacent to your home in a special tank, your very own personal supply. But, because every customer's needs are different, we visit each home before installing a tank to match your individual needs to one of the many solutions we can supply.
