

MacNean House
and Restaurant
Case Study

MACNEAN RESTAURANT CHALLENGE

Neven Maguire is undoubtedly Ireland's most progressive and creative chef; his passion for food is palpable in everything he does – serving guests at his famous MacNean House Restaurant, in his nationwide cookery demonstrations and on his dedicated TV show. When he took over the family business in 2001, Neven was already a Flogas devotee. Flogas fuelled the catering equipment in the kitchen and the gas fire in the lounge although an oil-fired boiler generated the heating and hot water.

As the restaurant's popularity increased, so too did the demand for accommodation. In late 2010, an opportunity to purchase the building next door arose, so Neven and his team set about remodelling the interior in order to create an additional nine guest bedrooms. Recognising that increased energy demands and costs would ensure, they approached Flogas for advice.

The Flogas Solution

After conducting a free onsite survey of both premises, the Flogas energy solutions team recommended modern, high-efficiency gas boilers to replace the old inefficient oil boiler in the original restaurant building and also for the new building.

Changeover Process

After conducting a free onsite survey of both premises, the Flogas Energy Solutions Team recommended modern, high-efficiency gas boilers to replace the old inefficient oil boiler in the original restaurant building and also for the new building. The Flogas LPG boilers were installed and now the whole operation benefits from one-source efficiency for all its cooking, heating and hot water requirements. The annual running costs have also come down significantly despite the extra bedrooms.

Results

- Clean economical burning fuel
- One source efficiency for all the house and restaurant, cooking, heating and hot water
- Significantly reduced running costs despite extra bedrooms
- Increased number of bedrooms, annual overheads cut, reduced carbon footprint and now only having to deal with one energy supplier were all achieved

"Our type of business requires a keen eye on the bottom line and especially our energy costs. The chance to gain increased bedroom accommodation, cut our annual overheads, reduce our carbon footprint and only have to deal with one energy supplier made the final decision a pretty easy one, to be honest. The whole process went like clockwork and we're absolutely delighted with the result" - Neven Maguire

It's just another example of how versatile and efficient LPG can be. As an energy solutions specialist, Flogas can design and implement a complete turnkey solution for your business, whatever its size. So why not avail of our no-obligation free survey? We'll analyse your existing energy costs and outline the benefits and savings you'll enjoy by converting to Flogas LPG.
